Education

Nanyang Technological University **Aug 2025 – May 2029 (Expected)**
Bachelor of Computer Science (Honours) *Singapore*

St. Andrew's Junior College **Jan 2021 – Dec 2022**
GCE A-Levels *Singapore*

Relevant Coursework

- Data Structures
- Algorithm Design
- Operating Systems
- Computer Networks
- Software Engineering
- Object-Oriented Prog.
- C/C++ Programming

Projects

SummerBuild: NTU Campus Sports Pickup App | *React Native, Expo, Supabase* **Jul 2026**

- Built a cross-platform mobile app with a team at NTU SummerBuild 2026 that lets students find and join pickup sports games on campus.
- Set up the backend from scratch in Supabase, covering auth, data storage and real-time updates.
- Built an NTU court map with geolocation so users can find nearby available courts.
- Implemented app-wide dark mode theming with React context, plus bottom tab navigation.

Stoxed: Stock and Crypto Telegram Bot | *Node.js, Telegraf, Claude API, Railway* github.com/tensixn/stoxed-bot

- Built a Telegram bot that answers stock and crypto questions in real time using the Claude API, deployed on Railway for continuous uptime.
- Fixed a security issue after finding committed API credentials in the repo: rotated both keys and rewrote the git history to remove them.

Personal Portfolio Website | *HTML, CSS, JavaScript, Vercel* roennn.vercel.app

- Built and deployed a personal site from scratch with a terminal boot sequence, light and dark modes, and a playground page with an interactive terminal.

Coursework Projects | *Nanyang Technological University* **Aug 2025 – Present**

- **Algorithms:** Implemented Dijkstra's shortest path algorithm with an adjacency list and min-heap as my part of a team analysis project.
- **Computer Networks:** Wrote a Java UDP client for the RFC 865 Quote of the Day protocol and captured its traffic with Wireshark.
- **Operating Systems:** Working through labs on xv6, a Unix-like teaching operating system.
- **Software Engineering:** Co-writing the requirements specification and use case documents for a team-built HDB Resale Flat Search and Analysis System.

Experience

Singapore Armed Forces **Aug 2023 – Jan 2025**
Dog Trainer *Singapore*

- Trained new members and dogs as In-Charge and Auxiliary Instructor, running a 2-week course for first-time members.
- Served as platoon Safety Advocate, raising welfare concerns to unit commanders and presenting improvement proposals.

Technical Skills

Languages: Python, Java, C, C++, JavaScript
Frameworks and Tools: React Native, Expo, Node.js, Supabase, Git, REST APIs, Wireshark, Vercel, Railway
Spoken: English, Chinese

Leadership / Extracurricular

Hall 6, Nanyang Technological University **Sep 2025 – Apr 2026**
Block President *Singapore*

- Planned regular Block Suppers to bring residents together and build a closer block community.
- Worked with hall management on initiatives to improve residents' welfare and day-to-day living experience.
